

Tu Huynh

Glen Waverley VIC 3150 / 0460 315 484/ ktuhuy1610@gmail.com/

Full Working Rights/Open to re-located

CAREER OBJECTIVE

Motivated and results-oriented **full-stack software engineer** with expertise in modern software development (frontend, backend, generative AI, and AWS). Proficient in React, TypeScript/JavaScript, Node.js, and AWS. Passionate about delivering innovative full-stack solutions, optimizing user experiences, and ensuring high-quality application performance.

SKILLS PROFILE

Languages: Git, Bash, C++, Fluent in HTML, CSS, JavaScript/TypeScript

Frontend: React, Redux Toolkit, Tailwind, MUI, Bootstrap, Flutter, ES6, Web Components, Next.js, Jest.

Generative AI: OpenAI API, DeepSeek API, ChatGPT-4o, DeepSeek-R1, Claude 4.x, Cursor, Copilot, Microsoft Copilot, Vibe Coding.

Backend: Node.js, NestJS, CMS (Strapi), REST APIs, GraphQL, Firebase, Authentication/Authorization, Databases (MongoDB, Firebase, DynamoDB, MySQL), Redis

CI/CD & DevOps: GitHub Actions, CloudFormation, Terraform, AWS CDK, Bash scripting, Linux/Windows, BuildKite,

Cloud Services:

- **AWS:** EC2, ECS, S3, IAM, CloudWatch, Lambda, API Gateway, DynamoDB, Route 53, CloudFront, Load Balancer, Parameter store, SQS, SNS.
- **Google:** Firebase

Soft Skills: Time Management, SCRUM, Team Collaboration, Customer Service, Agile Planning, Curiosity and Self-learning.

WORK EXPERIENCE

Kmart Australia Limited, Melbourne

Software Engineer (Full-time) | Aug 2025 – Current

Key responsibilities:

- Involved in solution design and collaborated with team member to implement SMS reminder for Kmart's customers.
- Involved and implemented event-driven data pipelines for OMFP (Order Management & Fulfillment Platform) regional stock availability system, processing millions of inventory records daily across 300+ retail locations.
- Developed controlled rollout mechanisms (proxy services) enabling feature releases with configurable allowlists at store, state and country level, reducing deployment risk.
- Collaborated with cross-functional teams to integrate stock reservation functionality into the checkout journey using GraphQL and Commercetools.
- Monitor and troubleshoot system performance using New Relic, creating NRQL queries to track data flows, verify proxy filtering, and compare record counts between legacy and OMFP systems

- Write comprehensive unit tests for external API integrations and service components.
- Responsible and maintain tasks from end to end.

Achievement:

- Successfully developed and delivered SMS reminder functionality in AWS Lambda, SQS, SNS, DynamoDB, etc.
- Successfully delivered OMFP regional availability proxy, enabling safe gradual migration from legacy IPS system to new OMFP data pipeline.
- Integrated Confluent Kafka connector to ingest real-time inventory feeds into AWS ecosystem.
- Implemented Redis-based deduplication layer to handle out-of-order Kafka messages and reduce downstream processing load.
- Created comprehensive technical documentation and presented system architecture to stakeholders.
- Successfully integrated with various API endpoint to delivered stock reservation using EC2, ECS, GraphQL, NextJS etc.

Technologies:

TypeScript, Node.js, NestJS, GraphQL, NextJs, AWS (Lambda, DynamoDB, S3, SNS, SQS, ECS, CDK, Parameter Store), Kafka, Confluent, Redis, Commercetools, Jest, New Relic, BuildKite.

Change Beetle, Melbourne

Software Engineer (Full-time) | Nov 2023 – April 2025

Key responsibilities:

- Responsible for solution designs and implementation of multiple customer facing initiatives such as Off-shore wind turbine planner web application.
- Collaborate closely with various internal and external stakeholders to define scopes, technical/nontechnical requirements to bring concept to production.
- Collaborate with UX/UI designers to enhance user experience and interface design of applications.
- Solution design and research different solutions to integrate generative AI chatbots.
- Responsible as DevOps engineer to design and implementing CI/CD pipelines.
- Collaborate with back-end developers to design REST API ensuring following industry standards.
- Work closely with product owner to conduct user-study and feature feasibility especially on how to apply generative AI into the current application.

Achievement:

- Successfully developed and delivered a wind turbine planner web application through modern software development life-cycle which achieved the Low Carbon Manufacturing Grant from Victorian Government.
- Successfully integrated front-end with back-end API developed in NodeJs, Python.
- Successfully set up Front-end framework including test automation using React, JEST.
- Successfully integrated with OpenAI API and delivered a break-through AI chatbot

using GPT-4o model, the user's feedback show that it's easier for them to find-out how to use the software

- Implemented CICD pipelines to automate deployment to Firebase.
- Set up and implemented authentication/authorization using Firebase.

Technologies:

React Typescript/JavaScript, ES6, Redux Toolkit, MUI, Firebase, ArcGIS SDK, Strapi, OpenAI API, Terraform, Github Actions.

Adiva Beauty Group, Burwood, Melbourne

Software Engineer/Front-end Developer (Full-time) | Feb 2023 – Oct 2023

Key responsibilities:

- Collaborate closely with various internal and external stakeholders to define scopes, technical/nontechnical requirements to provide a solution from concepts to production for both front-end and back-end.
- Solution design for company main website, customer check in & out, customer's feedback system including customer facing and backend management.
- Responsible to design pipelines for continuous delivery and deployment.
- Responsible to design and implement a monitoring system on AWS.
- Implemented different RESTful APIs on AWS using API Gateway, Lambda and DynamoDB.
- Ensure the solutions works as expected using unit testing, integration testing on front- end.
- Automated the deployment of the company's WordPress-based landing page using AWS services, including EC2, and Route 53, etc.
- Monitored application performance and AWS infrastructure, incorporating logging and alerts to proactively resolve issues and maintain system uptime.

Achievement:

- Successfully implemented and deployed company website using WordPress on AWS using Amazon EC2, CloudFront, ACM, Load Balancer, and Auto Scaling Group.
- Implemented a CICD pipeline to automate deployments via using GitHub Actions, CloudFormation, Bash.
- Integrated with Raygun for front-end monitoring, troubleshooting.
- Integrated with Instagram to automatically push images and posts from Instagram to main website.
- Integrated with various AWS services such as CloudWatch, AWS SNS for back-end monitoring.
- Successfully developed and deployed new serverless REST APIs for booking management, customer check in & out and feedback backend via AWS API Gateway, Lambda, DynamoDB.
- Integrated with Twilio for sending SMS.
- Successfully deployed Customer Checkin & Feedback system in AWS using Single page application with React, S3, CloudFront, API Gateway, Lambda, improving visibility into customer satisfaction using the newly deployed service.
- Implemented CICD pipelines to automate deployment to AWS.
- Successfully developed new unit testing, integration testing and automated user acceptance tests to ensure delivery's quality

Technologies:

React Typescript/JavaScript, ES6, Redux-toolkit, EC2, Route53, API Gateway, Lambda, DynamoDB, CloudFormation, WordPress, MUI.

Front end Developer (Internship)

Deakin Launchpad, Burwood Melbourne | Jul 2022– Oct 2022

Key responsibilities:

- Solution design and implement Deakin Launchpad website using React, MUI
- Implemented different RESTful APIs.
- Collaborate with Back-end developers to design RESTful APIs.
- Collaborate with UX/UI designers to enhance user experience and interface design of the applications.
- Ensure the solutions works as expected using unit testing on front-end.

Achievement:

- Successfully developed and implemented a Deakin Launchpad website.
- Successfully integrated with back-end API.

Technologies:

React JavaScript, MUI, Figma, Redux, Jest.

PROFESSIONAL DEVELOPMENT

AWS Certified Cloud Practitioner

Apr 2023 – Apr 2026

AWS Certified Solutions Architect Associate

Jul 2023 – Jul 2026

EDUCATION

Deakin University, Burwood

Mar 2019 – Oct 2022

Bachelor of Information Technology

Final Year Project: Created and developed a user-friendly and responsive website through specialist technology - React, MUI, Nodejs and Es6/7. I was responsible as a front-end developer accountable for the business (Gym) bookings and appointments with 6 team members. I was accountable for coding development and collaborations with the team leader to release the product in time.

- *Achieved 'Distinction Average' for the final year project (2022)*
